

CS 250 Module Four Tester Email

To: Christy

Subject: User Story Clarifications

Dear Christy,

I have taken a look at your user stories and am developing test cases for the different features to determine whether the product passes or fails. I need a bit more detail so that I can use more specific metrics to clearly define my test cases. Can you answer the following questions for me?

User Story One

- Do all the “Top 10” trips need to be listed on the same page or should they be listed separately (like with a slideshow—big picture up top and description below)?
- Should the list count down from 10 to 1 or start with #1?
- Are we doing a top-ten list for a specific type of vacation or will it include all types of vacation packages based on popularity?

User Story Two

- What kinds of column headers would you like to see for this option?
- Trip name, location, prices, description—do you also want them to be sortable by user ratings?
- Are we going to allow the user to specify a price range?
- How long are you looking for the description to be? A one-line overview or more comprehensive details?

User Story Three

- For the next user story, you indicate wanting a mobile app. Do we want to include every feature on the mobile app or limit the functionality?
- This user story seems more like an epic that will need to be broken down into smaller components. Can you give more details and wireframes for what you are envisioning here?

Thanks,

Brian
